DATE

June 13, 2026

A weekly AI review system.

Foundation is done. Persistence is next.

Proposal became a buildable project foundation.

[Repository base]

[Core documentation]

[Local review demo]

FastAPI skeleton + health/analyze route

Exists

Review quality rubric

Ready

GitHub issues / project board

Organized

Sample data produces a structured weekly review.

```
$ python3 scripts/run_sample_review.py  
✓ loaded data/sample/sample_week.json  
✓ called review_engine.rules.analyze_week  
✓ generated weekly review
```

```
outputs: wins · insights · risk_flags · next_steps · evidence ·  
generated_text
```

```
not yet: SQLite storage · CRUD flows · frontend review page
```

Evidence first. Then generated wording.

// AI vagueness

// Incomplete logs

// Feedback tone
